

CO2060 – Project Milestone 2 Presentation – Student Guidelines

Your team must prepare and present the following in a 10 minute presentation including 5 minutes demonstration of MVP in it and 5 minute viva:

1. Brief Project Background

- Restate the real-world problem functionalities and target users as an introduction.

2. Progress Summary (Since Proposal)

- What has been completed from your original plan.
- What challenges were encountered and how were they resolved.
- Show evidence of team collaboration (e.g., GitHub commit history, task distribution).

3. Demonstration of the MVP

- A working MVP that:
 - Executes core user workflows end-to-end
 - Uses a non-trivial database (data persists across sessions)
 - Has a functional UI (web or mobile)
- The system must be run live during evaluation.
- Be prepared to show code or database content if requested.

4. Customer Feedback with Evidence

- Present feedback from the real user.
- Submit verifiable evidence (e.g., survey screenshots, interview notes, usability logs).
- Explain how feedback shaped your implementation.

5. Project Plan for semester 4

- Submit a Gantt chart or timeline covering Semester 4.
- Show how the final product will be completed by end of semester 4.
- Testing strategy (unit, integration, acceptance).
- Deployment and documentation plan.

6. Professional Deliverables Setup

- Updated GitHub repository.
- Updated Project page.
- Updated e-Portfolios.

7. Presentation Standards

- All team members must speak.
- Dress professionally and speak clearly.
- 10 minutes for the full presentation (with demonstration) and 5 minutes for the viva.
