

CO2060 – Project Proposal Presentation – Student Guidelines

Your team must prepare and present the following in a 10 minute presentation and 5 minute viva:

1. Real-World Problem Statement
 - Clearly state the problem being addressed.
 - Identify the target users and explain why the problem matters.
2. Proposed Software Solution
 - Describe your Minimal Viable Product (MVP).
 - Specify what is in scope and out of scope for Semester 3.
3. Requirement Specification
 - List key functional requirements.
 - State critical non-functional requirements (e.g., usability, security, privacy).
4. System Architecture
 - Present a high-level system diagram showing:
 - Frontend
 - Backend
 - Database
 - Use clear, labeled figures.
5. Technology Stack
 - Specify your chosen:
 - Frontend framework/language
 - Backend framework/language
 - Database system
 - Deployment platform
 - Provide brief justification for each choice.
6. Project Plan
 - Submit a Gantt chart or timeline covering Weeks 9–13 (Semester 3).
 - Show how the working MVP will be completed by Week 13.
7. Professional Deliverables Setup
 - Confirm your GitHub repository is created and includes a README.
 - Confirm all team members have started their ePortfolios.
8. Presentation Standards
 - All team members must speak.
 - Dress professionally and speak clearly.
 - 10 minutes for the presentation and 5 minutes for the viva.
